

JOB VACANCY: Climate Change Researcher

Company: Green Future Salone

Location: Makeni, Sierra Leone (with travel)

Employment Type: Part-Time / Consultant

Role Summary Green Future Salone is conducting a study on the impact of changing rainfall patterns on rice production. We need a Climate Researcher to lead data collection, analyze meteorological trends, and publish findings to guide national policy.

Key Responsibilities

- Collect and analyze historical weather data from the meteo department.
- Interview farmers about changes in planting seasons.
- Use GIS software to map areas at high risk of drought or flooding.
- Present findings at national climate stakeholder meetings.

Qualifications

- Master's Degree in Environmental Science or Climatology.
- Proficiency in GIS tools (ArcGIS/QGIS) and statistical analysis.
- Published research in peer-reviewed journals is an asset.
